

Duplex System Slitter Rewinder Machine

Machine Model:

EMS-1300

Machine Name:

SLITTER AND REWINDER MACHINE

- 1200 mm Material Width,
- 1300 mm Idler Roller Width
- One Reel on Air Shaft of Unwinder Area
- Tottally two servo motors in rewinder area.
- 400 meter/minute Machine Mechanical Speed,.
- Magnetic Powder Brake System on Unwinder,
- Multi Reels on Two Friction Shafts of Rewinder Area
- Rubber Roller, Chrome Metal Roller in Main Roller which is driven by servo motor,
- Servo Motor driven friction shafts in one of the each two rewinder sections,
- Real Working Speed depend on the material quality and other conditions.
- Safety Chucks (Strong and High Speed Resistant) On Unwinder Units locks the air shaft and turn it.
- 3 inches (76 mm) Air Shaft (Strong and High Speed Resistant) on Unwinder Unit,
- 10 pcs. Straight(Razor) Cutting Knives and 5 pcs. Round Cutting Kinves Usage Ability,
- Edge Trim Waste Vacuum Blowing System,
- Automatic Edge Control in Unwinder,
- With Servo Torque Mode, Automatic Tension Control in each of the shafts of Rewinder,
- With Loadcell Tension Control Mode, Automatic Tension Control in Unwinder,
- 10 inches Touch Screen Control Unit,
