

Plastic Bag Corona Treater

Technical Information

- Aluminium Electrode with Aluminium Roll and Silicon Sleeve for None-Conductive Material (LDPE,HDPE,PP,OPP etc)
- Single Surface or Both 2 Surfaces treatment
- Zero Speed Sensor in order to know if the web is broken or not
- Oil Cooled High Voltage Transformer
- Ozone Extractor Blower (AC Motor type)
- Different Voltage Levels are possible depen on the country voltage level, 1 Phase 110-120-220-230 Volts or 3 Phases 220-230-380-400-415 Volts
- For 50-60 Hz Frequency Input
- Pot in order to control output power
- Output Current Indicator
- Audio Indicators for a Short circuit, Film Broken, no output etc.
- No Power on ouput if there is a Short circuit, Film Broken etc.

Silicone Sleeve for Corona Treater / Dielectric Sleeve for Corona Treatment
